

MANUTEC PRODUCT RANGE AT BIGW STORES

	Product Image	Manutec code & Description	Product use
1		MBP8080 GYPSUM 8KG	A natural soil conditioner applied to break down clay soils, improves soil structure, drainage and aeration.
2		MTO8000 Soil pH Test Kit	A simple, accurate and economical kit to instantly test pH of soil and potting mixes used by home and professional Gardeners and Horticulturists.
3		MBP8280 DOLOMITE LIME 8KG	A natural soil conditioner applied to acidic soils to increase soil pH toward neutral conditions. In addition to increasing pH it also supplements Magnesium content to soils Caution: Never apply near acid loving plants.
4		MTO0555 Sulphur (500G)	A soil conditioner applied in order to lower the soil pH or to increase the acidity/reduce the alkalinity of the soil. 99% Elemental Sulphur.
5		MTO5002 Orchid Food (500G)	A balanced soluble fertiliser specially formulated for year round feeding of orchids.
6		MTO5008 (500G) Orchid Bloom Booster	A Specific soluble fertiliser designed to promote increased size and colour of orchid flowers. Applied when flowers buds/spikes begin to form.
7		MTO2503 (250G) African Violet Food	A Specific soluble fertiliser designed for feeding potted African Violets and other "heavy feeders" such as tomatoes, vegetables and fruit and citrus
8		MTO5004 Bloom Booster (500G)	A Specific soluble fertiliser designed to promote increased size & colour of all types of flowers, rich in potassium. Applied when flowers buds begin to form & during flowering.
9		MTO5010 Hydrangea Blueing (500G)	A specific soluble fertiliser formulated to enhance and maintain blue colour of hydrangea flowers. Part 1 of the products helps to feed the nutrients while Part 2 helps to maintain acidic pH required for blueing.
10		MTO5011 Hydrangea Pinking (500G)	A specific soluble fertiliser formulated to enhance and maintain pink colour of hydrangea flowers. Part 1 of the products helps to feed the nutrients while Part 2 helps to maintain alkaline pH required for pinking.
11		MTO5007 Fruit & Citrus soluble (500G)	A specific soluble fertiliser to enhance flowering & fruiting in all fruits and citrus plants. Suitable for spraying for fast response and also suits applying to container grown fruit/citrus trees as there is less salt/chloride content.
12		MBP0250 Garden Complete 2.5KG	Organic & sulphate based balanced granular fertiliser suitable for feeding all types of garden plants.
13		MBP0251 Rose Fertiliser (2.5KG)	Granular Fertiliser specific to nutrient requirements of all types of Roses to promote healthy growth and flowering
14		MBP0252 Fruit & Citrus Fertiliser (2.5KG)	Granular Fertiliser specific to nutrient requirements of all types of fruits & citrus plants to promote healthy growth, flowering & fruiting.
15		MBP0254 Azalea & Camellia Fertiliser (2.5KG)	Granular Fertiliser specific to nutrient requirements acid loving Azalea & camellia group of plants.
16		MBP0401 Blood & Bone Premium (4KG)	Premium quality pure Blood & Bone product provides organic form of nitrogen and Phosphorus nutrients (but lack in Potassium & Trace elements). Also helps to condition the soils during soil preparation prior to planting
17		MTO5006 Trace Elements (500G)	A soluble blend of all the Trace Elements necessary for plant nutrition. Provides plants with a quick fix for all Trace Element deficiencies in one application.
18		MBP1105 Epsom Salts (1KG)	A highly soluble form of Magnesium, used to correct Magnesium deficiencies in plants. (also be purchased by customers for a range of other uses)
19		MBP1107 IRON SULPHATE (1KG)	Suitable for correcting Iron deficiencies. Also helps to acidify soils or potting mixes.
20		MTO0522 IRON CHELATE (250G)	A highly soluble chelated form of Iron which provides quick acting effect to over iron deficiencies common in alkaline soils. Unlike Iron Sulphate, under alkaline soils, this doesn't get trapped as unavailable and plants take up Iron easily.
21		MBP0156 TRACE ELEMENTS 1.5KG	All the Trace elements combined together in one easy to apply granular form which helps to fix all trace elements deficiencies in one application
22		MBP0266 POTASH 2.5KG	Highly soluble form of Potash to correct potash deficiencies and to enhance flowering, fruiting and plant's resistance.
23		MBP0404 POTASH 4KG	Highly soluble form of Potash to correct potash deficiencies and to enhance flowering, fruiting and plant's resistance.
