

MANUTEC PRODUCT RANGE AT MASTERS STORES

	Masters code	Product Image	Manutec code & Description	Product use
	1. Soil health & soil pH products			
1	900007327		MBP8080 GYPSUM 8KG	A natural soil conditioner applied to break down clay soils, improves soil structure, drainage and aeration.
2	-		MBP1511 GYPSUM 15KG	A natural soil conditioner applied to break down clay soils, improves soil structure, drainage and aeration.
3	902085223		MTO8000 Soil pH Test Kit	A simple, accurate and economical kit to instantly test pH of soil and potting mixes used by home and professional Gardeners and Horticulturists.
4	900007330		MBP0300 GARDEN LIME 3KG	A natural soil conditioner applied to acidic soils to increase soil pH toward neutral conditions. Caution: Never apply near acid loving plants.
5	900007328		MBP8180 GARDEN LIME 8KG	A natural soil conditioner applied to acidic soils to increase soil pH toward neutral conditions. Caution: Never apply near acid loving plants.
6	900007329		MBP8280 DOLOMITE LIME 8KG	A natural soil conditioner applied to acidic soils to increase soil pH toward neutral conditions. In addition to increasing pH it also supplements Magnesium content to soils Caution: Never apply near acid loving plants.
7	900002225		MTO0555 Sulphur (500G)	A soil conditioner applied in order to lower the soil pH or to increase the acidity/reduce the alkalinity of the soil. 99% Elemental Sulphur.
	2 Specific Soluble Fertilisers			
8	902185866		MTO5002 Orchid Food (500G)	A balanced soluble fertiliser specially formulated for year round feeding of orchids.
9	902185874		MTO5008 (500G) Orchid Bloom Booster	A Specific soluble fertiliser designed to promote increased size and colour of orchid flowers. Applied when flowers buds/spikes begin to form.
10	902185841		MTO2503 (250G) African Violet Food	A Specific soluble fertiliser designed for feeding potted African Violets and other "heavy feeders" such as tomatoes, vegetables and fruit and citrus
11	902185858		MTO5004 Bloom Booster (500G)	A Specific soluble fertiliser designed to promote increased size & colour of all types of flowers, rich in potassium. Applied when flowers buds begin to form & during flowering.
12	902185825		MTO5010 Hydrangea Blueing (500G)	A specific soluble fertiliser formulated to enhance and maintain blue colour of hydrangea flowers. Part 1 of the products helps to feed the nutrients while Part 2 helps to maintain acidic pH required for blueing.
13	902331460		MTO5011 Hydrangea Pinking (500G)	A specific soluble fertiliser formulated to enhance and maintain pink colour of hydrangea flowers. Part 1 of the products helps to feed the nutrients while Part 2 helps to maintain alkaline pH required for pinking.
14	900002218		MTO5007 Fruit & Citrus soluble (500G)	A specific soluble fertiliser to enhance flowering & fruiting in all fruits and citrus plants. Suitable for spraying for fast response and also suits applying to container grown fruit/citrus trees as there is less salt/chloride content.
15	900002220		MTO6713 Tomato Magic (1KG)	A specific soluble fertiliser for Tomatoes with high potassium content to enhance size and colour of fruits. High Calcium content also helps to overcome blossom end rot. Also suitable for related vegies Capsicums, Egg plants, Cucumbers etc.
16	900002219		MTO5009 Hydroponic Nutrient 500G	A soluble Fertiliser suitable for feeding plants grown under all types hydroponic or soil less cultures.
	3. Specific Granular Fertilisers			
17	900007334		MBP0250 Garden Complete 2.5KG	Organic & sulphate based balanced granular fertiliser suitable for feeding all types of garden plants.
18	900007339		MBP8055 Garden Complete(8KG)	Organic & sulphate based balanced granular fertiliser suitable for feeding all types of garden plants

	Masters code	Product Image	Manutec code & Description	Product use
19	900007335		MBP0251 Rose Fertiliser (2.5KG)	Granular Fertiliser specific to nutrient requirements of all types of Roses to promote healthy growth and flowering
20	900007340		MBP8015 Rose Fertiliser (8KG)	Granular Fertiliser specific to nutrient requirements of all types of Roses to promote healthy growth and flowering
21	900007336		MBP0252 Fruit & Citrus Fertiliser (2.5KG)	Granular Fertiliser specific to nutrient requirements of all types of fruits & citrus plants to promote healthy growth, flowering & fruiting.
22	900007341		MBP8025 Fruit & Citrus Fertiliser (8KG)	Granular Fertiliser specific to nutrient requirements of all types of fruits & citrus plants to promote healthy growth, flowering & fruiting.
23	900007337		MBP0254 Azalea & Camellia Fertiliser (2.5KG)	Granular Fertiliser specific to nutrient requirements acid loving Azalea & camellia group of plants.
24	900007342		MBP8045 Azalea & Camellia Fertiliser (8KG)	Granular Fertiliser specific to nutrient requirements acid loving Azalea & camellia group of plants.
25	900007338		MBP0255 Lawn Fertiliser (2.5KG)	Granular Fertiliser rich in Nitrogen specific to feed Lawns to promote lush green growth
26	900007343		MBP8065 Lawn Fertiliser (8KG)	Granular Fertiliser rich in Nitrogen specific to feed Lawns to promote lush green growth
4. Organic Fertilisers				
27	900007331		MBP0401 Blood & Bone Premium (4KG)	Premium quality pure Blood & Bone product provides organic form of nitrogen and Phosphorus nutrients (but lack in Potassium & Trace elements). Also helps to condition the soils during soil preparation prior to planting
28	900007332		MBP8480 Blood & Bone Premium (8KG)	Premium quality pure Blood & Bone product provides organic form of nitrogen and Phosphorus nutrients (but lack in Potassium & Trace elements). Also helps to condition the soils during soil preparation prior to planting
29	900007333		MBP0256 Blood & Bone Blend (2.5KG)	Blood & Bone blend provides organic form of nitrogen & Phosphorus and helps to condition the soils during soil preparation prior to planting.
5. Corrective Fertilisers for specific deficiencies				
30	900002222		MTO5006 Trace Elements (500G)	A soluble blend of all the Trace Elements necessary for plant nutrition. Provides plants with a quick fix for all Trace Element deficiencies in one application.
31	900002223		MTO5000 Potash 500G	Highly soluble form of Potash to correct potash deficiencies and to enhance flowering, fruiting and plant's resistance.
32	900002226		MBP1105 Epsom Salts (1KG)	A highly soluble form of Magnesium, used to correct Magnesium deficiencies in plants. (also be purchased by customers for a range of other uses outside of gardening)
33	900002227		MBP1107 IRON SULPHATE (1KG)	Suitable for correcting Iron deficiencies. Also helps to acidify soils or potting mixes.
34	900002221		MTO5022 IRON CHELATE (250G)	A highly soluble chelated form of Iron which provides quick acting effect to over iron deficiencies common in alkaline soils. Unlike Iron Sulphate, under alkaline soils, this doesn't get trapped as unavailable and plants take up Iron easily.
35	900002224		MTO5033 Copper Sulphate 500G	For correcting Copper deficiencies in gardens, completely soluble and provides fast response
36	900002228		MBP0156 TRACE ELEMENTS 1.5KG	All the Trace elements combined together in one easy to apply granular form which helps to fix all trace elements deficiencies in one application
37	900002229		MBP1104 POTASH 1KG	Highly soluble form of Potash to correct potash deficiencies and to enhance flowering, fruiting and plant's resistance.
38	900007344		MBP0266 POTASH 2.5KG	Highly soluble form of Potash to correct potash deficiencies and to enhance flowering, fruiting and plant's resistance.
39	900007345		MBP0404 POTASH 4KG	Highly soluble form of Potash to correct potash deficiencies and to enhance flowering, fruiting and plant's resistance.
